

Arroyo Seco Field Trip Alternate Assignment

Mr. Traeger

Please do a 2 page minimum research report on the following topic. You must cite your sources just like you did for the mineral project. Use the correct MLA format. See Mrs. Bozzani for an MLA format sheet.

Tell me about the geology of the San Gabriel Mountains. How were the San Gabriels formed, what kinds of rocks are in the San Gabriels, and what contributes to weathering and erosion of the San Gabriels? If you cannot find specific information on the geology of the San Gabriels, look up the geology of Southern California. Pay specific attention to Northern Los Angeles County. Please see Mrs. Bozzani if you need help finding information. Chapter 6 of your textbook will be very helpful for interpreting the types of rocks that are in our area.
