**Saturday, March 16, 2013**

**2:00 pm--3:00 pm**

In conjunction with JPL, the La Cañada Flintridge Library is hosting a new program, "NASAScience4Girls and Their Families." The program celebrates women in science, while instilling confidence in girls to explore the role of science in life and in their careers.

JPL scientist Dr. Erika Podest will join us to present her research using Earth observing satellites to monitor the impact of climate change on our planet.

This free family program is open to the community; registration is not required.

February 2013

For ADA accommodation, such as a sign language interpreter or materials in an alternate format, call 562-940-8462 (voice), or 562-940-8477 (TTY), M-F, 8-5, at least six days prior to event.
