

# Astronomy Institute

Are you interested in learning about the Universe, Galaxies, Solar System, and Earth's place in all of it? If so, then join Astronomy Institute! It would be ideal if you are already enrolled in Mr. Fulmer's Institutes STEP, but that is not a requirement. We will meet once a week to discuss topics that interest you. The year's activities will culminate in you presenting a project of your choosing on a topic that interests you at the year-end Institutes for the 21st Century showcase.

**When:** Every Wednesday from after school until 4 PM starting September 16, 2015

**Where:** Mr. Traeger's room 311

**Who:** Mr. Steve Edberg, a noted astronomer at JPL, will be your instructor for the course

**Activities:** Discussions, demonstrations, and hands on observing through Mr. Edberg's telescopes
